NC150+

NUTRI COMPLEX

PROTOCOL

BY COMBINING THIS ADVANCED FORMULATION WITH A SEAMLESS DELIVERY SYSTEM OF MICRONEEDLING TREATMENTS, PURASOMES NUTRI COMPLEX WORKS REMARKABLY WELL TO PROGRESS CELL REGENERATION TO THE LEVEL OF MAXIMUM PERFORMANCE, REVEALING YOUTHFUL REFRESHED AND GLOWING SKIN.

NUTRI COMPLEX

STEP 1

Clean the face with antimicrobial cleanser.

STEP 2

Use a syringe with 21G needle to take the product out from vial. Leave the needle inserted till you do a second time aspiration.

STEP 3

With the syringe without a needle apply drops of products on the face and glide if needed.

STEP 4

Begin treatment using cosmetic needling.

PROTOCOL

With a microneedling pen use circular motion.

The goal is to achieve an even erythema.

Reduce depth for under eye area and increase it slightly for thicker skin on the cheeks.

When done with the treatment, use sterile saline to rinse away blood or dried serum.

After cosmetic needling apply our GF20 Exosomes Boost and leave on till night time.

It is recommended for the patient to be very gentle with the skin during the healing process and avoid the sun and apply sunscreen.

It is generally recommended that micro needling be completed in a series of 3-5 treatments every 4-6 weeks, followed by maintenance with GF20 Exosomes Boost.

HSC50+

HAIR & SCALP COMPLEX

PROTOCOL

BY COMBINING THIS ADVANCED FORMULATION WITH A SEAMLESS DELIVERY SYSTEM OF MICRONEEDLING TREATMENTS, PURASOMES HAIR SCALP COMPLEX WORKS REMARKABLY WELL TO PROGRESS HAIR FOLLICLE STIMULATION TO HELP HAIR STRENGTHENING.

HAIR & SCALP COMPLEX

STEP 1

Wash the hair with a gentle cleanser.

STEP 2

Use a syringe with 21G needle to take the product out from vial. Leave the needle inserted till you do a second time aspiration.

STEP 3

Discard syringe with the needle in the appropriate sharp disposal container.

STEP 4

With the syringe without a needle apply drops of products on the scalp and glide as needed.

PROTOCOL

Begin treatment with a derma stamp cosmetic needling

Use 1mm needles for the PRP sessions with medical needling.

The goal should be an even erythema.

Purasomes HSC50+ can be applied topically using various easy-to-use micro needling devices as Derma Pen and Derma Stamp to facilitate active ingredients scalp penetration.

The frequency of treatments depends on the patients condition and desired results.

It is advised that a skin care professional develop a specific protocol for every patient.

We recommend to follow 120 days protocol of HSC50+ treatment combined with PRP to further stimulate hair growth in between the sessions and achieve even better results.

- Day 0 - Apply Purasomes HSC50+
- Day 30 - Conduct PRP treatment on the scalp to further stimulate new hair follicles
- Day 50 - Apply Purasomes HSC50+
- Day 90 - Conduct a 2nd PRP treatment
- Day 120 - Apply Purasomes HSC50+
